### Pavement Maintenance – Crack Sealing

The City of Brighton's contractor will be performing crack sealing on various roadways throughout the City beginning in the evening of Monday, April 22. Grand River will be the first road that will be done and that work will begin at approximately 8 pm and continue into the overnight hours. The other roads will be done in the order listed below over the next couple of weeks, in both the day and overnight hours. When the allotted amount of funding for this project has been expended, no more crack sealing will be done, so some streets listed will not receive this treatment.

The roads where the work will be performed are:

- Grand River Avenue from I-96 to just south of Cross Street
- Flint Road from Liberty to the I-96 overpass.
- Brighton Lake Road from Grand River to Northern Ridge Drive
- Black Walnut from Northern Ridge to the end of the new asphalt
- Main Street from Fourth to Seventh Street
- Main Street from Grand River to Spencer
- Spring Mountain Drive
- North Church Street from Grand River to Spencer
- South First
- South Second Street
- South Fourth Street
- South Fifth Street
- South Sixth Street
- Franklin Street
- Madison Street
- Brighton Street
- Livingston Street from Brighton to Seventh Street
- Brighton Street
- Michigan Street
- Washington from South Third to Seventh Street

During this time, the roadway will be open to through traffic; however, travelers may experience minor delays.

The City always appreciates the cooperation and patience of its residents, business owners, and visitors while we perform much-needed maintenance and improvements on our streets.
