**Date:** September 20, 2023

## FIRE HYDRANT FLUSHING

The City of Brighton Utilities Department will be flushing fire hydrants throughout the City's water utility service area between the hours of 7:00 am and 3:30 pm from Tuesday, September 26 through Friday, October 6, 2023, excluding Saturday and Sunday.

Additionally, beginning at 12 am Tuesday night/ Wednesday morning, the crews will be flushing hydrants on the following streets:

- All of Grand River from Brighton Village to the City limits at Kroger
- The Brighton Mall
- Challis Road
- All Brighton Lake Road
- East Main St and Spencer Road
- West Main Street to Third Street
- Mill Pond Lane
- Orndorf Drive

Please plan your water use accordingly. The procedure may cause some disturbances and discoloration in the water system following the flushing of the hydrants in your area as well as the day following. Customers may also experience a temporary drop in pressure. Please refrain from washing white or light-colored clothes during the flushing period.

If you experience discoloration and rust particles in your water, please run a **cold water faucet only** for approximately 10 minutes to clear the discolored water from your system. If the water is still discolored after running the cold water for 10 minutes, please turn off the faucet and repeat the previous step one hour later.

If you continue to experience discolored water, please call the City of Brighton at 810.844.5115 or email [dps@brightoncity.org](mailto:dps@brightoncity.org).
